

SNAKES by Bob Brown (Matthews Music)

3/4 time

C C

Chorus

F C G7 C
I like snakes - They're long and they're creepy and crawly

F C G7 C
I like snakes - They slither and slide on the ground

F C G7 C
I like snakes - Though most people think of them poorly

F C G7 C
I like snakes - But I stay far away when they're 'round

C

Horses have four legs and humans have two

G7 C

But snakes haven't even got one

C

But horses and humans can't curl like a rope

G7 C

And lie on a rock in the sun

Sure every one knows that a snake can be deadly

G7 C

They're fast and they're poisonous too

You've got to make sure when it sticks in it's fangs

G7 C

That the fang (thing) in it's fangs isn't you

CHORUS

Black headed pythons and boa constrictors

Are snakes that can cause a tight squeeze

Cobras and copperheads

Vipers and sidewinders

Make me go weak at the knees

Whip snakes and tiger snakes, black snakes and brown snakes

Are snakes that crawl 'round in long grass

You might see a few but the most that you'll view

Are the ones in the zoo behind glass

CHORUS

Not all snakes are dangerous they're often quite quite friendly

Some people keep them as pets

They're cleaner than chooks (chickens)

And they scare away crooks

And frighten the life out of vets

Now snakes are quite quiet

They don't make much noise

Their silence is verging on bliss

They don't squawk or fight

Or bark through the night

All that they do is go "hiss"

CHORUS X 2
